Features

Very small, lightweight and stylish design

Unique compact solid-state aluminum design (no moving parts); iAUDIO ensures skip free music, maximum portability and durability.

The ultimate in true reproduction sound quality produced by world-renowned technology

World-class JetAudio's MP3 technology produces rich and superb sounds so you can enjoy a variety of effects by adjusting 4 kinds of user Equalizer settings (Bass, Treble, Loudness, & Dynamic bass). With the adjustable "Dynamic Bass" technology exclusively developed by iAUDIO, you will enjoy true bass sounds.

Up to 30 hours of continuous skip free playback with one battery

Ultra power-saving circuit enables up to 30 hours of continuous playback with one AA type battery.

Continuous replay of important messages by recording

In addition to the MP3 playback the professional voice-recording facility provides you with the function of recording important notes, meetings or lectures. You can also save them to your PC for playback later on. The high fidelity recording mode will ensure your recordings are perfectly clear.

Listen to the FM stereo radio and record it at the same time!

With its superb FM stereo radio receiver, (probably the best on the market) you can listen to the FM radio and record it at the same time. It supports 24 preset channels and a variety of sound settings enabled by the equalizer.

Variety of user-friendly functions

The high-resolution backlit graphic LCD supports all languages including Korean, English, Spanish, Chinese, Japanese etc. It displays all the information including title, playtime, ID3 v1/v2 tag, etc. Two jog buttons and an easy-to-use menu makes iAUDIO very user-friendly.

LCD displays at the tip of user's finger

iAUDIO offers diverse DIY features for logos, fonts, LCD display and settings.

High-speed USB

Wide compatibility of USB and high-speed transfer rates of up to 6Mbps ensures fast file transfers.

Enjoy iAUDIO with its top-quality earphones provided

You can enjoy the ultimate sound with the high-quality earphones included. You don't have to purchase better earphones.

Upgradeable firmware through our websites

You can upgrade the firmware of iAUDIO cw300 through our websites. It will ensure you'll have very latest up to date features.

More features

- JetShell (file/CD transfer/conversion and playback software, included) makes MP3 file conversion to your iAUDIO cw300 quick and very easy;
- JetVoiceMail software offers voice mail; its voice compression technology provides you with the convenience of sending numerous types of voice mails.
- JetAudio provides you with the highest quality music.
